

Turn 6

Now that you have learned the way of maintaining profits, let's take a look at the factory again. As you will notice, you only have 10m^2 of available space left. Too little to build another fixed position layout, which needs at least 30m^2 .

Navigate to the "Info"-tab in the "Factory"-window and press the "Increase-Factory"-button. Now enter 20 in the prompt and confirm the build order. You might notice, that this operation costs you 20,000€, which is more than you have.

Luckily the bank has your back and offers you a credit of 10,000€. A gesture of good will towards the new owner! If you can already build the required space, do so now. Otherwise gather enough funds to expand your factory by 20m^2 and then make the build order.
